Heavy Duty Water Heater Element Wrench

<u>Stock#</u>	<u>Size</u>
#145	1-1/2" x 3/4" Socket (38 mm x 19 mm) 20" Handle (50.8 cm)
#324	20" Handle (50.8 cm)
#325	1-1/2" x 3/4" Socket (38 mm x 19 mm)

This is a professional grade tool specifically engineered to remove and install water heater elements without damaging the element or heater. The deep socket reaches past thickly insulated water heater enclosures to fit snugly onto the element.

The sliding "T" type handle allows for even pressure at both ends so the element can be removed or installed without the chance of bending, breaking or cross threading. The 12 point heavy duty socket can be moved to the end of the handle for additional leverage to remove extremely tight elements.

The drive socket and handle are made of heavy duty chrome plated steel.
