

# TALON DIRECT TO METAL ENAMEL COATINGS

# THE POWER TO PERFORM

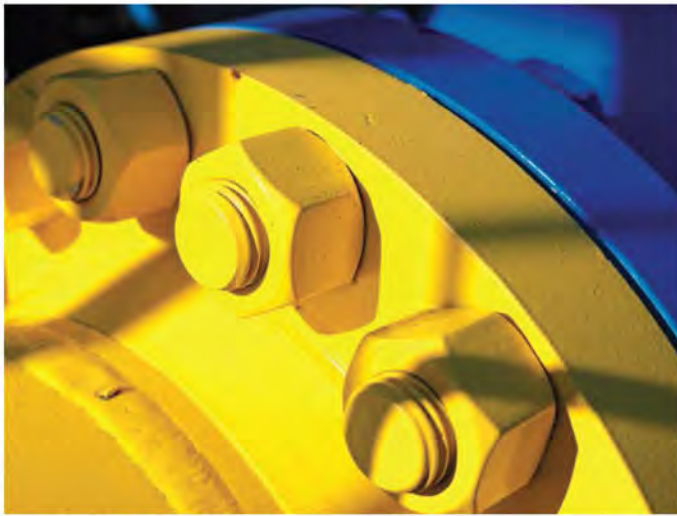

**TALON Direct to Metal (DTM)** Enamel Paint is a premium, industrial grade, long and medium oil alkyd enamel that is specially formulated for use on all types of metal surfaces for long lasting maximum corrosion protection.

**TALON DTM** may be applied directly to metal offering outstanding adhesion on properly prepared surfaces.

## **TALON DTM**

- Resists abrasion, weathering and color fading
- Resists oils, salt water, mild solvents and mild chemicals
- Provides excellent gloss retention and resistance to chalking
- Features long lasting protection with a tough durable finish
- Suitable for use in USDA inspected facilities

**TALON DTM** is excellent for piping, railings, drains, hydrants, flanges, grates, valves, backflows and most metal surfaces requiring a corrosion-resistant coating. Its special rust-inhibiting formulation creates an armor coating against the corrosion of metal and a shield against degradation due to weathering.

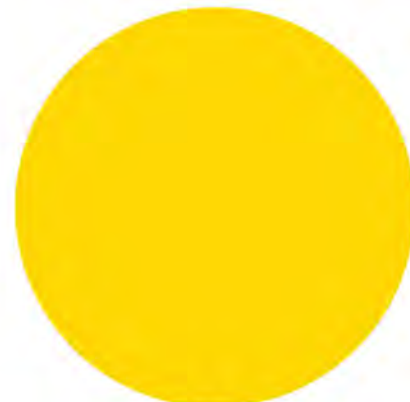

# COLOR GUIDE

**BRITE WHITE**

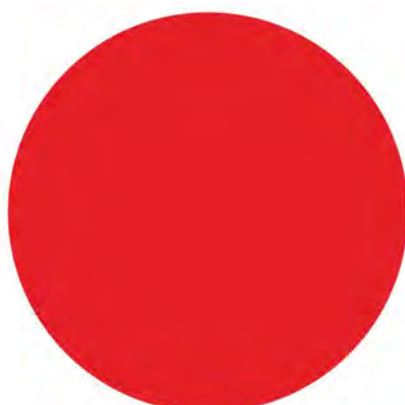

**MACHINERY GRAY**

**SAFETY YELLOW**

**SAFETY ORANGE**

**SAFETY RED**

**RECLAIMED PURPLE**

**SAFETY BLUE**

**SAFETY GREEN**

**BLACK DRAGON**

**RED OXIDE PRIMER**

**WHITE PRIMER**

## TALON DIRECT TO METAL PRIMER

TALON Direct to Metal Primer in Red Oxide, Gray and White is a fast drying corrosion-resistant metal primer. It is used as a base coat for painting structural steel, piping, metal roofing, machinery, both inside and out. Talon Primer's zinc rich medium alkyd oil base provides superb cohesion with the substrate to form a protective coating to prevent future rust development.

## LEADING THE WAY IN QUALITY AND INNOVATION

J.C. Whitlam Manufacturing Company began manufacturing coatings in 1900. Today, J.C. Whitlam Manufacturing supplies over 300 chemical specialty products and continues to be family owned and operated for five generations.

With hundreds of products and supplies, we serve a variety of fields, delivering dependable products that are based on industry experience and chemical engineering expertise. From scheduled lab tests during manufacturing to careful monitoring, we maintain a high level of quality control, so you get the results you need every time. Quality, experience and reliability; it is what you'll find when you work with the J.C. Whitlam Manufacturing Company.

## “BLACK DRAGON” GILSONITE ASPHALT PAINT

BLACK DRAGON is a quick drying, high-gloss asphalt enamel paint. For painting metal, masonry, and wood surfaces, inside and out where a corrosion resistance black protective coating is desired. Provides excellent corrosion protection for all types of metal surfaces including pipes.
