

WHITLAM/PLUMB-PRO

Fitting Brushes

WIRE HANDLE PLUMBING COPPER FITTING BRUSHES

High Carbon Steel, Reusable Copper Cleaning Brushes with Wire Handle.

SOLID HANDLE PLUMBING COPPER FITTING BRUSHES

High Carbon Steel, Reusable Copper Cleaning Brushes with Solid Plastic Handle.

All Whitlam fitting brushes are finished to exacting standards to ensure maximum contact of the bristle ends and cutting edges.

A GOOD FITTING BRUSH is designed to clean and score copper, providing the proper texture for solder to flow into and bond to the surface.

Good fitting brushes are made from the toughest carbon and stainless steel wire. The technology to work with this very hard wire, in extremely short lengths, has been perfected at J.C. Whitlam Mfg. Co.

A POOR QUALITY FITTING BRUSH is a brush that has ragged and uneven bristles and is less effective.

The work of the brush is done by the sharp ends or the wire bristle. Therefore, only bristles of the proper length clean the fitting. Short bristles do not make contact and long bristles bend over and slide on the side of the wire. Ragged or uneven brushes are not as effective and are less expensive to produce.
